maica™

Maica maiCompact is a high-performance 13mm compact laminate designed for demanding interior applications. It offers excellent resistance to impact, scratching, moisture, heat and everyday wear. Its dense, non-porous surface is easy to clean, with antibacterial and antifungal properties supporting hygiene-sensitive environments. Available in a wide range of colours and woodgrain finishes, maiCompact combines durability with versatile design options.

Manufactured in Malaysia with European technology for exceptional durability and lasting performance.

FUNDERMAX
MaxResistance²

Fundermax Max Resistance² is a high-performance compact laminate engineered for demanding laboratory, healthcare and specialist environments. Featuring Fundermax's RE surface technology, it provides exceptional resistance to aggressive chemicals, acids, solvents, impact, abrasion and scratching. Its non-porous surface is easy to clean and disinfect, while excellent moisture resistance and dimensional stability ensure reliable long-term performance.

Backed by a 10-year warranty against colour or surface changes. Engineered in Austria, Fundermax delivers premium quality, durability and performance for high-traffic environments.

FUNDERMAX
Exterior

Fundermax Max Exterior is purposely-engineered for demanding outdoor applications. Its double-hardened acrylic-polyurethane surface provides excellent resistance to UV exposure, weathering and colour fading, alongside strong resistance to impact, scratching, moisture, frost and heat. Designed and tested for genuine exterior use, it is ideal for outdoor furniture and applications where long-term durability and colour stability are essential.

TECHNICAL DETAILS

Scribe Lines
Custom scribe lines add depth, texture, and a slatted aesthetic to panels

Prefix Drilling
Pre-drilled hinge plates, handles and hardware for faster, more accurate installation.

Panel Joins
Join panels seamlessly for long runs using our precision cutting and finalising.

Hinge Drilling
Hinge cup holes can be drilled to suit your specifications and hinge requirements.

Radius Corners
Internal and external radius corners available to suit design and safety requirements.

Hinges
Premium hinges with mounting plates for reliable performance and longevity.

Cut Outs
Cut-outs for basins, sinks, appliances and services to your exact requirements.

TABLETOPS

CUT TO SIZE

OFFICE / COMMERCIAL

Smart, professional solutions for workplaces, reception areas, meeting rooms and breakout spaces.

EDUCATION

Practical and hardworking surfaces for schools, universities and training facilities.

EXTERIOR

Weather resistant surfaces that performs beautifully outdoors.

Durable, scratch resistant and long-lasting

Sleek finishes that enhance professional spaces

Low maintenance surfaces for busy environments

Built for classrooms, lockers, labs and student amenities

Impact resistant and built for long-term daily use

Colours and finishes to suit any environment

UV and weather resistant for external applications

Ideal for outdoor furniture, kitchens and exposed areas

Colour stable and designed to endure the elements

Heat, stain and water resistant surfaces

Food safe, anti-microbial and anti-bacterial

Easy to clean and built for high-traffic use

Chemical and solvent resistant surfaces

Non-porous and hygienic surface finish

Ideal for labs, research and technical areas

Custom furniture, cabinets and joinery solutions

Wide range of colours, features and finishes

Cut to size and machined to your specifications

HOSPITALITY

Practical and hardworking surfaces for schools, universities and training facilities.

LABORATORIES

Chemical resistant surfaces for laboratories, science rooms and technical spaces.

CUSTOM SHAPING / ROUTING

Tailored solutions for furniture, joinery and custom laminate projects.
